Professional Summary

Business Analyst with 3.5+ years of experience in SQL, Python, statistical analysis, A/B testing, and business performance analytics across travel-tech and fintech domains. Proven track record in driving 30%+ revenue growth, optimizing conversion funnels, and building predictive risk models using machine learning. Strong expertise in stakeholder management, KPI tracking, and data-driven strategy execution.

Work Experience

TBO.COM

Business Analyst - Manager

Gurgaon, India
Jul 2024 to Present

- Designed and delivered conclusive analytics outputs (dashboards, reports, deep-dive analyses) to support leadership decision-making across commercial and growth teams
- Designed and evaluated A/B tests and controlled experiments to validate pricing, supplier performance, and demand hypotheses, contributing to 32% YoY revenue growth in FY'26
- Led multiple analytical projects focused on improving order value, conversion rates, and funnel performance, translating insights into actionable recommendations
- Defined, standardized, and tracked business health metrics and KPIs, enabling consistent performance evaluation across teams
- Built automated dashboards and alerting mechanisms to proactively identify anomalies, drops in conversion, or revenue leakage
- Partnered closely with Product and Data Engineering teams to improve data instrumentation, tracking completeness, and event accuracy
- Wrote clean, optimized SQL queries (MySQL) to extract and manipulate large datasets from RDBMS systems
- Supported senior stakeholders with ad-hoc analysis and scenario modeling to answer business-critical questions

Business Analyst - Associate Manager

Gurgaon, India
Jul 2022 to Jun 2024

- Led initiatives in pricing strategy, driving the growth of NRM by 43% y-o-y
- Applied statistical frameworks (central tendency, dispersion, correlation, regression) to understand demand patterns and seasonality
- Supported A/B testing and experimentation initiatives to evaluate marketing effectiveness and pricing strategies
- Analyzed user journey drop-offs using SQL and dashboarding; identified key friction points leading to measurable improvement in conversion rates
- Promoted to Manager within 2 years based on strong analytical impact and revenue contribution

BETTER.COM

Disclosure Audit Analyst

Gurgaon, India
Jun 2021 to Jun 2022

- Reviewed and validated 900+ high-volume financial datasets, ensuring compliance, accuracy, and risk mitigation.
- Built structured audit reports and analytical summaries for senior leadership, improving operational quality and decision-making.
- Identified discrepancies leading to \$10,000+ investor savings and a 9% reduction in repayment issues.

Project

CREDIT RISK REDICTION

Python

- Created gender, education, age, and marital status wise credit score cards using Python. Used Random forest technique (ML) to forecast the number of defaulters.
- Built a classification model (Random Forest) to predict credit card default risk with 86.8% accuracy.
- Applied feature engineering, data visualization, and model evaluation techniques to improve risk segmentation.
